Mapping Legacies at UNCG

This map was created by History/Museum Studies graduate students at the University of North Carolina at Greensboro. It charts patterns in commemoration across the years, examining whom the university has chosen to honor. In addition, you can explore detailed stories about ten building namesakes at the associated website, [Building Legacies](#).

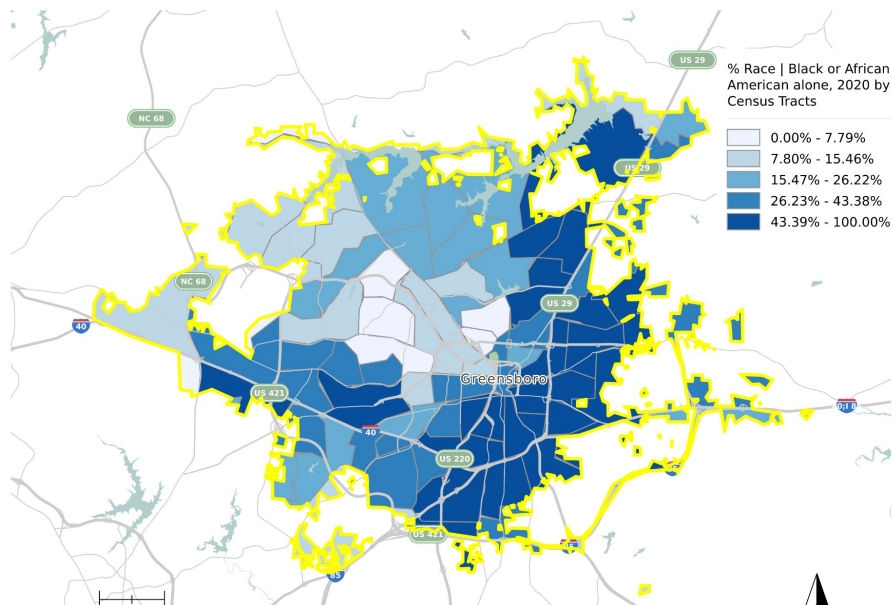

Environmental Justice & Food Deserts

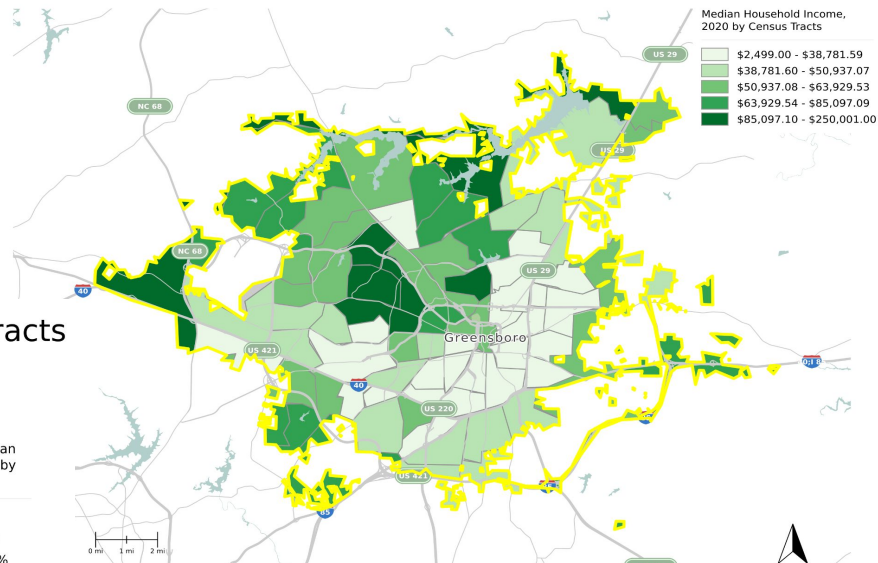

Redlining in GSO with SimplyAnalytics

% Black or African American in GSO in 2020 by Census Tracts

Median Household Income in Greensboro in 2020 by Census Tract:

Structural racism & community data:
ideas for teaching librarians
