

Data Visualization & Mapping

StoryMap JS

A free online tool for mapping stories from Northwestern University's Knight Lab.

Using Google Maps or Mapbox, you can map a series of events and import media from a variety of sources.

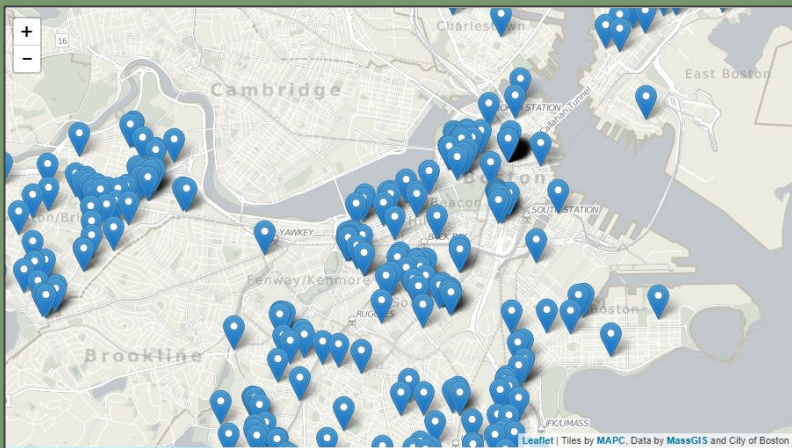

The logo for StoryMap JS, featuring the word "StoryMap" in a large, bold, black sans-serif font, followed by "JS" in a smaller, white sans-serif font inside a blue square.

— — —

R

A free and open-source programming language/single-line command software.

Can be used to analyze geospatial data, create simple visualizations.

Packages and plugins can extend functionality into webmap development and more.

ArcGIS

[ArcGIS Desktop](#)
[ArcGIS Online](#)
 (or from [UNCG Software Catalog](#))

Esri Training Resources

 QGIS - a **free**, open-source desktop GIS software with much of the functionality of ArcGIS, which can be expanded with plugins and used within R.

Also can be used alongside SAS or R

Data Vis. Tools

- Google Data Studio: [Earth, Water, Air, and Rising Temperatures](#)
- R: [Box Plots](#)
- Tableau: [Student Enrollment at UNCG](#)
